

NAME _____

This Assignment is going to take place over two class periods. We have been learning about plate tectonics and natural disasters. The goal of this lesson is to combine the two together. On day 1 of the lesson you will watch a video on natural disasters that explains how they occur and gives examples. While you watch the video, take notes below to help you in the writing process on day 2. On day 2 of the lesson you will take the notes plus your knowledge of plate tectonics and answer the question below.

Directions for day 2:

Write an essay explaining how natural disasters are caused by the earth layers, seafloor spreading and plate tectonics. The essay must be a minimum of three paragraphs with five sentences per paragraph. To get all the points you must discuss all three of the topics listed in the question along with how earth quakes and volcanoes are formed. You can use your notes and slides from google classroom to help. Copying and pasting from the internet will earn you a zero. (25pts)

Place any information from the video that you think will help you with the essay below. This part of the lesson is worth 15pts. (Must have a minimum of 15 things written below. You can write more) This is due at the end of the period.
