Section 1 ■ The Atmosphere
Section 2 ■ Earth's Weather

Directions: Match the definitions in Column I with the terms in Column II by writing the correct letter in the spaces provided.

Column I

- _____ 1. the most abundant gas in the atmosphere
- _____ 2. the force that prevents Earth's atmosphere from moving into outer space
- _____ 3. the second most abundant gas in the atmosphere
- _____ 4. the atmospheric layer that contains the most ozone
- _____ 5. the atmospheric layer that contains the ionosphere
- _____ 6. the location of 2.05% of Earth's water

Column II

- a. oxygen
- b. nitrogen
- c. stratosphere
- d. gravity
- e. ice caps and glaciers
- f. thermosphere

Directions: Choose the correct term from the list below and write it in the space by its description.

conduction

evaporation

convection

condensation

precipitation

- _____ 7. liquid water becomes water vapor
- _____ 8. water vapor becomes liquid water
- _____ 9. drops of water or ice crystals become too large to stay suspended in clouds
- _____ 10. molecules collide and transfer energy
- _____ 11. warm air rises and cool air sinks

Directions: Use the following terms to complete the sentences below.

prevailing westerlies

trade winds

jet streams

polar easterlies

12. Mild winds blowing toward the west are called _____.
13. Cold winds blowing toward the west are called _____.
14. Winds blowing toward the east are called _____.
15. High altitude rivers of air are called _____.
